Profile

If you ask a former colleague or fellow student, then they will tell you that I am responsible and empathetic. I am stubborn when it comes to completing my work. I am optimistic, and a teammate who is always ready to help my colleagues. I can work independently, but I'm always happy to work in groups. I am a stable attendee, and I am ready to make a great effort on both the project that I'm working on, but also improving my technical skills.

Education

2019–2020: Main course (Web developer) Roskilde Tekniske Skole - Grade (12/A).

2019: Basic course (Web developer) NEXT

Work experience

2021–2022: Advice A/S (Full time) – I mainly worked independently on websites, but I also worked on other various tasks such as embedded solutions and updating of React Native apps (Gatsby, Next.js, TypeScript).

2020–2021: SubReader (Full time) – I worked primarily on their website in Gatsby, but slowly moved towards features and bug fixes on the React Native mobile app.

2020: SubReader (Part time) – I worked on their website in Gatsby and TypeScript.

2020: TDC – Nuuday (Internship) – I worked with ReactJS and Styled Components during the internship period.

Web development skills

Markup languages:	HTML5	I have good experience with HTML in the form of SEO optimization and have developed with it since the beginning of my basic course.
Programming languages:	JavaScript, TypeScript, Node.js	I have a lot of experience with both TypeScript and JavaScript, and have developed Express and Fastify servers with NodeJS.
Frameworks:	React, Preact, Next.js, Gatsby, Vue3.	<p>I work mainly in React (Next.js), and have a lot of experience with Gatsby and standard React / Preact.</p> <p>I still need to refresh my memory with Vue, since I haven't worked with it in a while.</p>
Query languages:	GraphQL	I have used GraphQL for Gatsby and APIs.
Mobile Development	React Native	I have experience using React Native from my prior workplace.
Design tools	Figma, Photoshop, Gimp.	I'm not much of a designer, but I'm able to take a Figma design and make it into reality.
Styling (CSS):	SCSS, CSS, Styled Components, Emotion, Goober, Tailwind.	Can use them all with closed eyes. All the different CSS in JS solutions use SCSS that I have worked with a good amount.
Bundlers/Task runners:	Gulp, Webpack, Rollup, Parcel.	I have the most experience with Webpack, but I have also used Rollup and Gulp when it suits the job. Parcel for fast implementation of ideas.
Databases:	MongoDB, MySQL.	<p>I have the most experience with MongoDB.</p> <p>I haven't worked with MySQL since my education, so I would need a refresher to get it up to speed.</p>
Version control system:	Git	I use git daily on my machine, and have used both GitHub and Bitbucket for many projects.

Operating systems

Arch Linux – I love Linux, particularly Arch Linux. I use it on my computer at home.

Windows – I have good experience with Windows, as I used it a lot before switching to Linux.

macOS – I used it for both education and work, so no problem there.

Languages

Danish – Mother tongue.

English – Well written, and well-spoken.
