Personal information

Name: Henrik Mundt Milo

Address: Sandhusvej 23, st. tv.

Phone: (45+) 60476780

E-mail: Henrik265@outlook.dk

Birthday: 11/10/1999

Website/Portfolio: <https://henrikmundtmilo.dk/>

LinkedIn: <https://www.linkedin.com/in/henrik-mundt-milo/>

GitHub: <https://github.com/HenrikDK2>

Profile

If you ask a former colleague or fellow student, then they will tell you that I am responsible and empathetic. I am stubborn when it comes to completing my work. I am optimistic, and a teammate who is always ready to help my colleagues. I can work independently, but I'm always happy to work in groups. I am a stable attendee, and I am ready to make a great effort on both the project that I'm working on, but also improving my technical skills.

Education

2019–2020: Main course (Webdeveloper), Roskilde tekniske skole - Grade (12/A).

2019: Basic course (Webdeveloper) NEXT

Work experience

2021–2022: Advice A/S (Full time) – I mainly worked independently on websites, but I also worked on other various tasks such as embedded solutions and updating of React Native apps (Gatsby, Next.js, TypeScript).

2020–2021: SubReader (Full time) – I worked primarily on their website in Gatsby, but slowly moved towards features and bug fixes on the React Native mobile app.

2020: SubReader (Part time) – I worked on their website in Gatsby and TypeScript.

2020: TDC – Nuuday (Internship) – I worked with ReactJS and Styled components during the internship period.

Web development skills

Markup languages:	HTML5	I have good experience with HTML in the form of SEO optimization and have developed with it since the beginning of my basic course.
Programming languages:	JavaScript (Includes TypeScript, NodeJS), Python.	<p>I have a lot of experience with both TypeScript and JavaScript, and have developed Express and Fastify servers with NodeJS.</p> <p>I have basic knowledge of Python.</p>
Frameworks:	React, Preact, Next.js, Gatsby, Vue.	<p>I work mainly in React (Next.js), and have a lot of experience with Gatsby and standard React / Preact.</p> <p>I still need to refresh my memory with Vue, since it's been a while, but I have worked with Vue 3</p>
Query languages:	GraphQL, GROQ.	<p>I have used GraphQL for Gatsby and APIs.</p> <p>I have used GROQ in connection with Sanity CMS.</p>
Mobile Development	React Native.	I have experience using React Native from my prior workplace.
Design tools	Figma, Photoshop, Gimp.	<p>I'm not much of a designer, but I'm able to take a Figma design and make it into reality.</p> <p>Same with Photoshop and Gimp. Not a designer, but I have basic knowledge of the tools.</p>
Styling (CSS):	SCSS, CSS, Styled components, Emotion, Goober, Tailwind.	Can use them all with closed eyes. All the different CSS in JS solutions use SCSS that I have worked with a good amount.
Bundlers/Task runners:	Gulp, Webpack, Rollup and Parcel.	I have the most experience with Webpack, but I have also used Rollup and Gulp when it suits the job. Parcel for fast implementation of ideas.
Databases:	MongoDB, MySQL.	<p>I have the most experience with MongoDB.</p> <p>I haven't worked with MySQL since my education, so I would need a refresher to get it up to speed.</p>
Version control system:	Git.	I use git daily on my machine, and have used both GitHub and BitBucket for many projects.

Operating systems

Arch Linux – I love Linux, particularly Arch Linux. I use it on my computer at home.

Windows – I have good experience with Windows, as I used it a lot before switching to Linux.

macOS – I used it for both education and work, so no problem there.

Languages

Danish – Mother tongue.

English – Well written, and well-spoken.

A little about me, and my hobbies

I build my own desktop computer, and I love tweaking my system to get every drop of performance out of it. Be it overclocking or disabling unnecessary processes running in the background.

I'm quite the gamer, I have over 500 games on Steam. My favorite game developer is From Software, I've played their Souls game to death. I also however love Silent Hill 2 and Path of Exile.

I come from a family that loves old rock and metal songs, It was only natural that I would develop the same love for those genres too. I particularly love songs from bands like Bon Jovi, Metallica, and Iron Maiden.

My favorite TV series is Star Trek: Deep Space Nine, the more recent ones that I enjoyed were Squid game, Loki, and The Boys.

I've also watched a lot of anime, and read a bunch of manga too. To note a few good ones that I like are Gintama, Berserk, Black Lagoon, Spy x Family and Monster you know not the generic trash.

Most of my hobbies are computer related, that is also the reason I ended up in this profession, and I hope to find a good workplace with people that I can fit in with.
